- Portfolio: https://www.marialmeida.site

OBJECTIVE:

- To teach through my experiences, learn from real-life situations, and create through unity. Always giving my best in every new opportunity.

PERSONAL DATA:

- **Interests:** Software Development, Front-end Technologies and Tools, Design and User Experience (UX/UI), Code Optimization and Security, Logic Challenges and Fast Thinking, Human-Computer Interaction.
- **Language:** Portuguese (Native), English (Proficient for professional use).

ACADEMIC TRAINING:

- Computer Science – PUC Coração Eucarístico | Belo Horizonte – Mar 2024 / Dec 2027.
- Computer Technician – IFMG Campus Formiga | Formiga – Mar 2021 / Dec 2023.

PROJECTS:

- Girls in Ctrl - Women in Tech Incentive App – Flutter, Laravel, and Firebase Notifications.
- Harmonia - Emotional Support System (Front-end) – HTML, CSS, and JS.
- Website Dev Fest 2024 - Devfest Website for GDG Community – Next.js.
- Workshop React.js e Next.js - Workshops on Tools – Held at PUC Coreu, Liberdade, and Devfest.
- Caroneiros - Carpool System for PUC COREU Students – React.js, Tailwind.css, Java, and PostgreSQL.

EXPERIENCES:

- **Software Developer – WebTech PUC Minas (May 2024 - Present)**
  - We develop system solutions and offer workshops, lectures, and materials on technology, promoting continuous learning and knowledge updates. My main challenge has been working outside the technical field, directly engaging with the public at events to share knowledge and connect with professionals.
- **Front-End Developer – SA-PUCTec (Sept 2024 - Dec 2024)**
  - I develop web and mobile interfaces with a focus on front-end and UX/UI design, creating intuitive and responsive experiences using tools like React and Figma. My biggest challenge is managing demands independently, taking responsibility for the progress of projects, which has been my most significant learning experience.
- **Software Developer – Embrappi Innovation Hub IFMG (Aug 2023 - Jan 2024)**
  - We developed a system for an engineering company using PHP and Laravel, enhancing teamwork, deadline management, and decision-making autonomy. As the lead for the front-end area, I was tasked with creating an interactive table using Livewire, which boosted my confidence and solidified my technical skills.

INTELLECTUAL AND SOCIAL SKILLS:

- Algorithms: Proficient in languages such as C, C++, and Java.
- Full-stack Web Development: Experience with JavaScript, React, Next.js, PHP, and Laravel.
- Mobile Development: Skilled in development with Dart and Flutter.
- UX/UI Design: Experience in user experience and interaction, using tools like Figma.
- Education: Passionate about teaching and sharing knowledge, with a strong interest in participating in initiatives that promote learning.
- Art and Creativity: Strive to integrate creativity and computational thinking in projects, aiming for innovative and functional solutions.
- Leadership: Comfortable taking on leadership roles, performing with excellence and responsibility. I value continuous learning from more experienced colleagues to enhance my skills.
